

Potassium Ferricyanide Schooner

Carl Hennig, Kitchener, ON, Canada

For Gekko and his always positive comments.

The photos used in this image.
Sharpie Schooner. Model sailboat kit by [Midwest](#).

Potassium ferricyanide 40x AJO Jun9. Microscope photo at 40x, The holes in the specimen looked like sails.

Potassium ferricyanide 100x AJO ½w Jun9. A four photo stitch with feather like texture. Used as the masts for the schooner. The ½w plate was used to add some colour.
